

Empathy Map

Date	06 July 2026
Team ID	
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I think I understand this concept • I can explain it, but I'm not sure • I need feedback on my answers	THINKS • Do I really understand this? • What if my explanation is wrong? • I need a way to check my knowledge
Rahul <i>Student</i> <i>Learner</i>	
DOES • Studies concepts from notes/videos • Tries to explain topics aloud • Practices for exams	FEELS • Confused • Unsure • Motivated to improve
