

Demonstration of Proposed Features

Date	06 July 2026
Team ID	
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document outlines the key features that were proposed during the initial planning phase of the Voice-Based Concept Understanding Analyzer and tracks their implementation status. It demonstrates how effectively the system was developed to meet the intended objectives, including audio processing, concept evaluation, and report generation.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Audio Upload	User can upload or record voice input	Implemented	Yes	Fully working
2	Speech-to-Text Conversion	Converts audio into text using models	Implemented	Yes	Accurate output
3	Audio Waveform Visualization	Displays waveform of input audio	Implemented	Yes	Clear visualization
4	NLP & Semantic Analysis	Evaluates understanding of concept	Implemented	Yes	Uses NLP techniques
5	Scoring Engine	Generates performance scores	Implemented	Yes	Multi-parameter scoring
6	PDF Report Generation	Generates detailed analysis report	Implemented	Yes	Includes all metrics

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
